

Onsite Referral Process for Triggered SBRA's

The aim of the Transnet Onsite Clinic Referral Process is to assist the nursing practitioner with referrals from the Clinic to the EAP Call Centre. Referrals may differ from each case type depending on the type of feedback requested. The form has been attached and the nursing sister will be required to fill in the form with the employee. Once completed and signed by both the employee and nursing sister the form is to be scanned and emailed to EAP Call Centre sbra@mhg.co.za.
